## Medications

Nasalide, Opticrom

~~Medrol, prednisone~~

Vantolin, Inhaler, inhaler

Neo-Synephrine

Avoid histamine, walk 3

times a day. Nasalists

3 times a week

Emergency Epi life threatening

Metacor, fibre, metformin  
but then cause of stomach  
distress

Zantac - very expensive

No combination

metamucil, but causes

stomach distress, so

diet forbids

stretching exercises

diet

regular visits Periodontal

prescription

prescription

special shots

- Operation eventually

Avoid dairy products

- 30 skin cancer - several operations. No sun. Use sun screen even on rainy days. Lip balm Vigilante.
- 31 hernia avoid heavy lifting,
- 32 hip socket problem - undiagnosed
- 33 susceptible to recurrent pneumonia - flu shot
- 34
