Re: Reverend Edward Avery

Dear Reverend Lynn;

Thank you for taking time from your busy schedule to meet with us on September 20, 1993. You had requested at the meeting that a letter be sent to you with Father Ed Avery's diagnosis and a summary of the recommendations we reviewed at the meeting. Father Ed's diagnosis includes the following: Axis I Generalized Anxiety Disorder, History of Alcohol Abuse and an Axis II of Personality Disorder with dependent features. There is no diagnosis of a sexual disorder for a number of reasons. There is only one report of abuse and Father Ed had been drinking during those incidents, both by his and the victim's report. Our testing and clinical data do not support a sexual disorder at this time.

The Treatment Team's recommendations for Father Ed post discharge from the Villa include: (1) continued outpatient treatment; (2) an aftercare integration feam (ministry supervision); (3) a ministry excluding adolescents and with a population other than vulnerable minorities, with whom Father Ed tends to over identify with; (4) attendance at a 12 step AA meeting for priests; and (5) that any further involvement with the H'Mong be in an administrative or pastoral capacity.

Father Ed is currently interviewing spiritual directors and will make that decision next week. He has contacted three priests who have consented to be on his support team. They are Monsignor Charles Devlin (if he is Vicariate I), Monsignor Francis X. Schmidt, and Father James Locke. The core support team would include his family, Mr. and Mrs. Joseph McGough.

I hope that the above information is adequate for your needs and please feel free to contact me if I can help you in any way.

Sincerely, Traine & Dellaria

Wayne L. Pellegrini, Ph.D.
