

I did not have any problems with girls. I did not have problems then with boys in high school. But as the year 1961 went on, I felt stronger sexual feelings toward boys. These feelings ~~seem to~~ ^{led to} ~~touch~~ ^{touching / fondling} them around the penis, outside of their pants. Also I started to question them about their sexual development - under the guise of "sex instruction" - for my own curiosity.

(No sexual instruction to 17-18 yr olds)

(check dict to R.R. Property for date) ROUGH RIVER

Either in late spring or summer of 1961 I took several boys to Rough River to a ^{vacation} ~~vacation~~ camp. During that trip, I touched one boy around his penis several times - outside his clothing. This startled me and him. Later when we returned to Louisville I felt very ashamed. I telephoned him to please come see me in the rectory. I apologized to him for what I did. I assured him that I would not touch him again. He accepted my apology. (The pastor questioned me about having the boy come to see me. I responded that it was a private matter between the boy and myself.)

APOLGOGY

I never touched the boy again

In the fall of 1961 I started to touch a few boys and found that the urge to do so was affecting me very much. That is probably when I singled out certain boys. Yet it seems that any one could be a "target." To this day I cannot recall which boys I abused by fondling.

But only certain ones become "targets." My offensive behavior was reported to parents, pastor and (Archbishop) in late November 1981.

FALL
REMOVAL
RETREAT

Removal from the assignment, a eight day, or more, retreat, dates with a Psychiatrist, (preparation from the Archbishop) followed. This is when I volunteered to leave the active ministry. But the Archbishop said no and that "I would be a good priest." Within four weeks I was reassigned to another parish.

VOLUNTEERED
TO LEAVE

REASSIGNED

I remained in my second assignment almost two years. The pastor loved boys and girls. He was a great children's sports enthusiast. He thought I should be more like this. ^{at that time} There was not the "work pressure" in this assignment as in my previous one.

LESS WORK
STRESS

(Which leads me to realize that I must re-write my "self abuse cycle diagram" for this two year period.) In 1962 I had no problems. I was around boys very much. But I was determined not to become physically familiar by hugging or personally touching.

O.N. GUARD

In February 1963 the pastor was sick and it was his month to be in Florida (annual). When he returned @ Fort 1st his illness became worse: Tuberculosis. For the spring he went to the
